Project submission guidelines

- Test files for your program are available at arthur.cs.vt.edu . Anonymous ftp to the server and use your email id as a password. The files are in the directory "pub/CS4304".

- You will create a TAR'ed and GZIPped file named as outlined below:

  <last name><first initial><middle initial>##.tar.gz
  where ## is the submission number.
  For eg. arthurjd01.tar.gz

- The most recent submission (i.e. the submission with the highest number) will be chosen for grading.

- Your "tar.gz" submission should contain:
  - Source code**
  - Binary (compiled using the "–static" option)
    Use the command "file FN" to be sure you included the –static option was used when you compiled your program
  - Input files *that I provide*** and your corresponding outputs**
  - README file** containing:
    - Name
    - Social Security Number
    - How to invoke the program
    - What works and what does not
    - A synopsis of any "extra credit" work
  - Makefile or "make script"
  - Any additional input/output files** showcasing your extra credit work

- Hard copies of all items starred (**) above must also be handed in during class on the due date

- Your tarfile MUST NOT contain any directories

- Upload your file via ftp to arthur.cs.vt.edu. CD to the 'incoming/Compilers/' folder. "Put" your tar.gz file there.
