

Please answer 4 of the following questions. For each question, give your opinion and reasons for your opinion,. You must also find either a supporting or a dissenting argument. Please include a reference to your source. The source need not be a book or a journal article; however please do not use any references to blogs or other sites where people can simply spout their opinions without reason. I will trust your judgment, but if the source looks questionable I will check it out.

1. The government should have the right to intercept any communication that they have the reason to need.
2. A National ID with an RFID would be a good idea.
3. Law enforcement should have the ability to locate cell phones.
4. The US should not have tried to ban the exporting of encryption.
5. Encryption is all the is needed to make computing more secure.
6. Trusted computing is all that is needed to make computing more secure.

This is due via e-mail to me, dmcphers@vt.edu by the end of the day on the day of our final exam. Our final exam is scheduled for Saturday May 6. Please return either a doc, rtf or a pdf file.
