

CS3724
Introduction to Human-Computer Interaction
Homework 4 (Formerly Homework 5)

Note: This is an individual assignment, not a team assignment. The Honor Code applies. Work on this assignment is to be done individually.

What to do

The essence of this assignment is to classify within the UAF each of the example usability situations in "set #2" (see separate link to these, with the homework on the course website). Follow the instructions for Homework 3.
