

Taxonomy of Mobility

From: D.S. Milojcic et. al.

Taxonomy of Mobility

From: Tanenbaum and van Steen

Mobility and Remote Operations

- **Remote execution**

- **Remote evaluation**

- **Process migration**

- **Mobile agents**

Characteristics of Mobile Agents

- **Encapsulated:** code, data, itinerary, activity, etc.
- **Autonomous:** decisions on what to do, where to go and when to go.
- **Asynchronous:** has its own thread of execution
- **Local interaction :** with other mobile agents or stationary objects locally.
- **Disconnected operation:** in the absence of a network connection
- **Parallel execution:** among agent dispatched to different sites

Architecture

Lange's Seven Good Reasons for Using Mobile Agents

- reduce network load
- overcome network latency
- encapsulate protocols
- execute asynchronously and autonomously
- adapt dynamically
- naturally heterogeneous
- robust and fault-tolerant
