Welcome to Computer Science 1044
Introduction to Programming in C/C++
Instructor and Course Information

Instructors:
Instructor: William D McQuain
Email: mcquain@cs.vt.edu
Office: 631 McBryde Hall
Office Hours: 8:00 – 9:15 MTWRF
and by appointment

Course Description
Credits: 3
Prerequisites: None but computer/web literacy is assumed.

Objectives:
The purpose of this course is to teach the fundamentals of structured programming and problem solving in the C/C++ programming language.
Texts & References

Required:

Recommended:

(available for purchase at A-1 Copies in University Mall)

Other Useful Sources of Information:

- Visual C++ Online Help
- CS 1044 website:  [http://courses.cs.vt.edu/~cs1044/summer01/mcquain/](http://courses.cs.vt.edu/~cs1044/summer01/mcquain/)
- C/C++ Usenet group:  [alt.comp.lang.learn.c-c++](alt.comp.lang.learn.c-c++)
Evaluation and Grading:

Point Distribution

Final grades will be based on the average achieved over the following:

<table>
<thead>
<tr>
<th>Item</th>
<th>Weight</th>
<th>Tentative Dates</th>
</tr>
</thead>
<tbody>
<tr>
<td>Homework and Quizzes</td>
<td>10%</td>
<td>Varied</td>
</tr>
<tr>
<td>Project Testing and Software Engineering</td>
<td>50%</td>
<td>Varied</td>
</tr>
<tr>
<td>Midterm Test</td>
<td>15%</td>
<td>TBA</td>
</tr>
<tr>
<td>Final Exam</td>
<td>25%</td>
<td>10:30-12:30 p.m. Saturday, June 30</td>
</tr>
</tbody>
</table>

Grade Scale:

The usual 10-point scale will apply (subject to any curve). A final average of 90% will guarantee an A-, 80% will guarantee a B-, and so forth.

Curve

A grade curve may or may not be employed in this course. The application of a curve is dependent upon class performance on tests and homework. The decision to utilize a curve rests entirely with the course instructor.
Class Organization

Sources for Help/Questions etc.
CS 1044 Classmates:
   CS 1044 Listserv for questions, announcements by instructor, etc.

General C++ Language Help
USENET Newsgroup: alt.comp.lang.learn.c-c++
   A panel of "experts" will respond to questions.
   We DO monitor the group.

Lecture Instruction
Lectures will consist of presentations, applications, problems and solutions interspersed with classroom discussion.
Test Environments

- All programming assignments submitted are required to compile under either Microsoft Visual C++, version 6.0.
- Programs will be tested under Windows 2000/NT.
- It is the student’s responsibility to ensure that his/her programs execute correctly in the appropriate environment; programs that do not will receive substantial deductions.

Program Evaluation

- Students are required to submit their source code files to the Curator system.
- Be sure to read the *Student Guide to Submitting* in the course notes pack. It describes how to prepare to submit a program to the Curator and discusses how the Curator scores your submissions.
- All submissions to the Curator are subject to the Virginia Tech Honor Code. Read the online Course Contract for a detailed discussion.
Damage Control

Backups

- **Students are responsible for making backup copies of all their work in this course.** Loss of work due to hard drive failure is **NOT** an acceptable excuse. Backup copies of files on the same hard drive are not backup copies. Backup copies of files on second hard drives are also risky. Backup copies should be maintained on two separate distinct storage mediums, (e.g., hard drives and floppies).

- Backup copies should be maintained until after the end of the term and students have received their course grade. (The Army lives by triplicate for a reason.)

- Remember: Computer systems are mechanical devices. Systems fail. Plan for it. It is inevitable!

Deadlines

- **Assignments have deadlines.**
- **Deadlines are temperamental little beasts, hug one too tightly and it is likely to bite.**
