

```

13 public static void displayArray1(int[] array, int first, int last)
14 {
15     System.out.print(array[first] + " ");
16     if (first < last)
17         displayArray1(array, first + 1, last); ✓
18 }
19

```

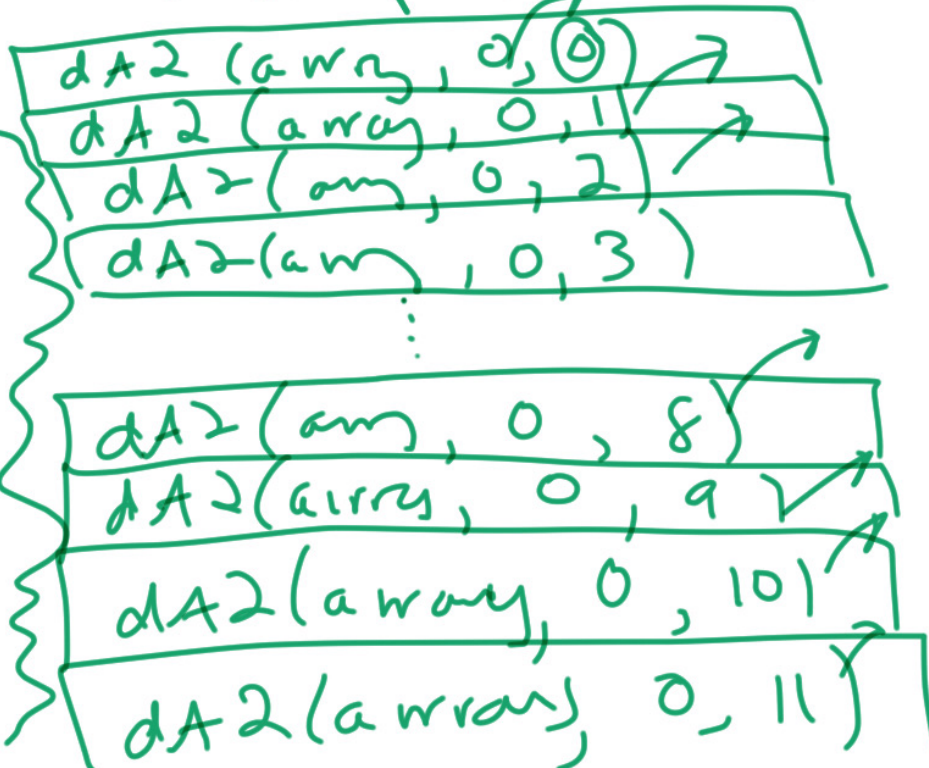

10 2 15 7 ... 8 100 51

```
28 public static void displayArray2(int[] array, int first, int last)
29 {
30     if (first <= last){
31         displayArray2(array, first, last - 1);
32         System.out.print(array[last] + " ");
33     }
34 }
```

Correction from video, need {} around code block

10 2 15 7 ... 7 8 100 11
