

## **CS5704: Implementation Demo (Homework 3)**

### **Due Date**

Week of Dec 1st, 2008

### **Type of Deliverable**

This is a team deliverable. Each team should produce one implementation of the calendar management system and give a demo of this system to the GTA.

### **Deliverable Content and Format**

In this deliverable you are to provide a complete implementation of the system as specified by your requirements document.

- You are to demonstrate a working prototype with all requirements from the SRS clearly and completely implemented
- The GTA will use the requirements in your SRS (in whatever format you had them given your development methodology) as a checklist to see how complete your implementation is during the demo.

### **Submitting the Deliverable**

Please do the following:

- Schedule a demo time with the GTA
- Email the GTA (and CC the instructor) a zip file of the entire implementation and a readme file explaining how the system should be setup and executed
